

# BUILD IT

## Robot Trade

Names \_\_\_\_\_

In this activity, you are going to trade your bot with another group's bot. (If possible, you should try to disconnect your bot from your controller, switch it with the other group's, and hook up their bot to your controller and test it out. Then try out your bot with their controller.) Try to trade with more than one group and write your observations below.

**Group**

**Their Bot's Strengths and Weaknesses**
